

## Member Services and Price List

Below is a list of the overall benefits and specific services included with your membership.

You will receive the best care when you have an ongoing relationship with your physician, which is why we encourage you to consider joining Mint Lone Tree as a member. Almost all of our patients are members.

However, we understand that membership is not for everyone. If membership is not for you, we also offer Pay As You Go pricing.

With the Pay As You Go option, you pay only for the specific service(s) you receive when you interact with our clinic. And though you will miss out on the many benefits of being a member - such as the unparalleled access, same or next day appointments, and more - you will still receive the same comprehensive care and attention that our members receive.

We do not bill insurance for any of the services provided in our clinic. However, you can use your insurance for lab testing, vaccines, and other services you receive outside of our clinic.

***The prices and services listed here are current as of 9/8/20. Pricing may change based on our actual costs.***

***Unless otherwise noted, the prices for Pay As You Go patients are in addition to any applicable Office Visit fees listed below.***
